

# HOW TO PLAY ONLINE PICTIONARY

Bring the classic game of Pictionary to your next online meeting! Use Zoom for the best results, but feel free to play around with other platforms, too. Simply follow the directions below.

## GETTING STARTED

- Choose a date and time for your “Online Pictionary” game. Schedule a Zoom meeting.
- Send an invitation to your students via email or your LMS, and include the Zoom link.
- Greet your students as they enter the chat, and let them talk freely.
- After a few minutes of socializing, mute all participants so you can explain the game.

---

## GAME RULES

- Select a student to be the first “drawer.” Send this student a direct message with the drawing prompt.
- Give the student ~30-60 seconds to create their drawing. Students can either hold their paper up “art teacher style” or draw flat and then reveal the completed drawing.
- Have other students type their guesses in the group chat. The first person to guess correctly gets to draw next.

---

## TIPS

- Thoroughly explain and demonstrate the game before starting.
- Show students how they can draw on a propped up surface “art teacher style” or flat on the table before revealing. Let each student choose the method that works best for them.
- Unmute students one at a time if they have questions.
- Familiarize yourself with the basic Zoom functions for shutting off a participant’s audio and video in case of inappropriate behavior.
